**Objective**

The SPDR® S&P MIDCAP 400® ETF seeks to provide investment results that, before expenses, correspond generally to the price and yield performance of the S&P® MidCap 400® Index™.

Ordinary brokerage commissions may apply.

**About This Benchmark**

The S&P MidCap 400 covers over 7% of the U.S. equities market, and is part of a series of S&P U.S. indices. Included in the index are companies with market cap in the range of US\$ 1 billion to US\$ 4.5 billion. This range is reviewed from time to time to ensure consistency with market conditions. The index also includes companies that should have four consecutive quarters of positive as-reported earnings, where as-reported earnings are defined as GAAP Net Income excluding discontinued operations and extraordinary items.

Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. Visit [spdrs.com](http://spdrs.com) for most recent month-end performance. Performance of an index is not illustrative of any particular investment. It is not possible to invest directly in an index.

After-tax returns are calculated based on NAV using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown. The after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

±Frequent trading of ETFs could significantly increase commissions and other costs such that they may offset any savings from low fees or costs.

\*Passive management and the creation/redemption process can help minimize capital gains distributions.

**Definitions:** **Return after Taxes on Distributions** represents returns after taxes on distributions, assuming shares were not sold. **Return after Taxes on Distributions and Sale of Fund Shares** represents the return after taxes on distributions and the sale of fund shares. **Market Value** is determined by the midpoint between the bid/offer prices as of the closing time of the New York Stock Exchange (typically 4:00PM EST) on business days. **NAV** is the market value of a mutual fund's and ETFs total assets, minus liabilities, divided by the number of shares outstanding. An **Intraday NAV** is calculated and published throughout the trading day. It is based on the last trade price of each holding listed in the basket used for creation and redemption including estimated cash amounts. This value is used to provide an intraday relationship between the basket of securities representing the ETF and the market price of the ETF. **Est. 3-5 Year EPS Growth** is based on the underlying holdings of the fund. The actual earnings estimates for the underlying holdings are provided by Factset, First Call, I/B/E/S Consensus, and Reuters and are used to calculate a mean 3-5 year EPS growth rate estimate, this measure is not a forecast of the fund's future performance. **Price/Earnings Ratio FY1** is the closing price divided by the sum of the forecasted fiscal year earnings per share. **Price/Book Ratio** is the current market price of the stock divided by the most recently reported book value for the prior fiscal year.

**Important Risk Information:**

Investments in **mid-sized companies** may involve greater risks than those in larger, better known companies, but may be less volatile than investments in smaller companies.

**Equity securities** may fluctuate in value in response to the activities of individual companies and general market and economic conditions.

While the shares of ETFs are tradable on secondary markets, they may not readily trade in all market conditions and may trade at significant discounts in periods of **market stress**.

**ETFs** trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns.
